

To whom it may concern,

8-1-06

I am serving a life sentence for a crime I did not commit. I was arrested in May 1990 for sexual battery on a child. I was in bed with my fiancée 20 miles from the crime scene at the time of the offense. Six other people were in the home where I slept, all of whom testified on my behalf.

I have listed the pertinent facts of my innocence below.

1. DNA evidence was taken from the victim which could not be identified as having come from me.

2. My Public Defender never presented this inconclusive DNA evidence to the jury at my trial.

3. This evidence was prematurely destroyed before more advanced testing could be done to possibly identify another suspect.

4. The victim initially identified her assailant as her bearded father to the police. She said her assailant had a beard. I was clean shaven at the time of this offense, as stated in the depositions of my defense.

5. I passed a thorough polygraph examination on April 22, 2005 and previous psychological testing demonstrated that I did not possess characteristics of a child molester. (Enclosed is Polygraph test)

I did not do this crime or would ever think of harming a child. I just want the truth to be told & the truth is, I did not do this crime! Do you think that 7 people would get on stand & lie for someone that is accused of molesting a child? No way! The States only case against me was to say all my witnesses were liars. Not true!

A lot of evidence was not shown or told to the jury. I feel that if it was they would not of found me guilty.

I hope to hear something from you soon because if your not interested I need to send this else-where. There is a lot of other things screwed-up in my case & I just dont want to drag this - out.

P.S. If you need to call someone that has knowledge of my case call my Aunt (Sharon Johnson)
(912) 562-3045

Thank You for Your Time,
Scotty Johnson
